Question 1

Correct

Marked out of 1.00

Given an ArrayList, the task is to get the first and last element of the ArrayList in Java.

Input: ArrayList = [1, 2, 3, 4]

Output: First = 1, Last = 4

Input: ArrayList = [12, 23, 34, 45, 57, 67, 89]

Output: First = 12, Last = 89

Approach:

1. Get the ArrayList with elements.
2. Get the first element of ArrayList using the get(index) method by passing index = 0.
3. Get the last element of ArrayList using the get(index) method by passing index = size – 1.

Answer: (penalty regime: 0 %)

```

1 import java.util.ArrayList;
2 import java.util.Scanner;
3
4 public class FirstAndLastElement {
5     public static void main(String[] args)
6     {
7         Scanner scanner = new Scanner(System.in);
8
9         // Get the number of elements
10        int n = scanner.nextInt();
11
12        // Create an ArrayList to store the elements
13        ArrayList<Integer> numbers = new ArrayList<>();
14
15        // Read the elements and add them to the ArrayList
16        for (int i = 0; i < n; i++) {
17            int element = scanner.nextInt();
18            numbers.add(element);
19        }
20
21        // Get the first and last elements
22        int firstElement = numbers.get(0);
23        int lastElement = numbers.get(n - 1);
24
25        // Print the ArrayList and the first and last elements
26        System.out.println("ArrayList: " + numbers);
27        System.out.println("First : " + firstElement + ", Last : " + lastElement);
28    }
29 }
```

Question 2

Correct

Marked out of 1.00

The given Java program is based on the ArrayList methods and its usage. The Java program is partially filled. Your task is to fill in the incomplete statements to get the desired output.

```
list.set();  
list.indexOf();  
list.lastIndexOf()  
list.contains()  
list.size();  
list.add();  
list.remove();
```

The above methods are used for the below Java program.

Answer: (penalty regime: 0 %)

Reset answer

```
1 import java.util.ArrayList;  
2 import java.util.Scanner;

Question 3

Correct

Marked out of 1.00

Write a Java program to reverse elements in an array list.

Sample input and Output:

Red

Green

Orange

White

Black

Sample output

List before reversing :

[Red, Green, Orange, White, Black]

List after reversing :

[Black, White, Orange, Green, Red]
